

# *Sweep Away the Competition*

## DRY FLOOR CARE

### Solutions

### Upgraded, Ergonomic Sweeping Solutions

CFS Brands - Sparta has added exclusive new ergonomic, functionality, and sustainability features to our already popular line of commercial-grade upright brooms. We know you will be swept away by the innovative improvements made to this line of floor-cleaning products.

### Features & Benefits

- **Ergonomic Design:** We've redesigned our upright brooms so that the handle placement eliminates potential wrist discomfort and reduces sweeping fatigue.
- **Improved Functionality:** Angled heads and a selection of broom sizes/lengths allow for greater reach into corners and tight places. ACME compatible threads were added to the broom's handle openings to ensure a tighter, more permanent fit.
- **Sustainability:** The bristle base/broom caps are now manufactured using recycled materials, and their new curved block design reduces waste during the production process.

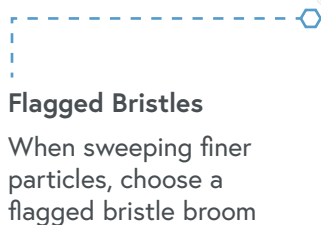

#### Ergonomically Improved

Our threaded openings are repositioned for better handle placement that reduces wrist strain

#### Unflagged Bristles

For heavier (or moist) debris, unflagged brooms get the job done

#### Flagged Bristles

When sweeping finer particles, choose a flagged bristle broom

#### Added Threads Reduce Twisting Dreads

Additional ACME compatible threads added to the broom handle openings mean a tighter fit – so no frustrating twisting & turning
