# Chill Out With AIR CURTAIN Refrigerators

## Safe, Cold Food Even With The Door Open

Equipped with horizontal and vertical air flow, air curtain refrigerators (ACR) maintain cold food at temperatures of 41°F or less for up to two hours--even when the door is open! CFS Brands – Dinex ACRs accommodate large quantities of cold food items on 15 full-size or 30 half-size trays. They are a necessity for any tray line assembly process. Facilities that strive for improved performance, enhanced efficiency, and energy savings choose Dinex ACRs.

## Features & Benefits

- **Safe Food Temperature Control:** Horizontal and vertical air screen maintains interior temperature below 41°F with the door open for up to 2 hours\*
- **Convenient, High-Capacity Serving:** Prepared foods are easily stored and served from 15 no-tip tray slides that hold a greater number of full- or half sheet options than other ACRs.
- **Wide Variety of Door Options:** Traditional doors swing out 270° for easy, convenient access to contents. A new tempered glass door saves time and labor by making the contents visible when the door is closed. A new sliding door allows for more efficient operation and easy maneuvering in tight spaces. All doors are available in left- and right- opening options.
- **Eco-friendly Refrigerant:** Reduced energy consumption yields more savings. Dinex offers one of the only ACRs that use clean technology resulting in a global warming potential reduction of more than 45% compared to R404A refrigerant.\*\*
- **Quick Cooling Cabinet:** ACR internal temperature cools from 80°F to 41°F in 30 minutes or less.

### Improved Operational Efficiency

A sliding stainless steel door can be used in areas with space limitations since they don't require any swing space

### High Tray Capacity

Removable tray slides accommodate (15) 18" x 26" or (30) 14" x 18" trays

### Quick Cooling Cabinet

Cabinet cools from 80°F to 41°F in 30 minutes or less

### Immediate Visibility

A new tempered glass door allows visibility of the items inside the cabinet without having to open the door
