**NSF APPROVED LOUIS™ TUMBLERS FROM  
CARLISLE FOODSERVICE PRODUCTS**

January 27, 2009, Oklahoma City, OK—Make work easier – and more cost efficient – with new Louis™ Tumblers from Carlisle FoodService Products. This NSF-approved line of tumblers has the beauty, look and feel of glass but is made of transparent, chip-, shatter- and break-resistant SAN, completely eliminating replacement costs associated with glass.

Available in seven practical sizes, including 8-ounce Old Fashion and 22-ounce water tumblers, the clean, faceted body shape of Louis™ Tumblers makes each glass easy to hold and doubles as a stacking lug, eliminating the need for interior lugs. A perfect match for any foodservice operation, including catering, healthcare tray service, bar, room and tabletop service, Louis™ Tumblers are excellent for cold beverage service wherever glass breakage can be a problem, especially within outdoor serving applications. Let this attractive collection of tumblers easily up-scale the look and feel of your operation while saving you money.

For more information about Louis™ Tumblers and the more than 50,000 other Carlisle FoodService Products designed to help make your work easier, call 1-800-654-8210 or visit our website at [www.carlislefsp.com](http://www.carlislefsp.com).
