Non-Contact FDA Infrared Forehead Thermometer

Simple to Operate

The Non-Contact FDA Infrared Forehead Thermometer is designed for measuring body temperature, specifically for use on the forehead area. Requiring no skin contact, the thermometer works by collecting heat radiation emitting from the forehead. It’s a more hygienic, reliable option for fever-checking compared to intrusive oral thermometers. Receive highly accurate measurements in seconds with the single click of a button. An integrated alarm sounds when raised body temperature is detected, making it easy to inform both user and individual of a potential fever.

- +/- 0.4°F (0.2°C)
- Auto shut-off after 30 seconds to save battery with power saver
- Pre-calibrated
- Commercial grade
- 1 year warranty
- Resolution: 0.1°F (0.1°C)
- Requires (2) AAA batteries; batteries included

Benefits

- FDA, CE & ISO 13485 Certified
- Temp Range: 89.6°F – 109.2°F (32°C – 42.9°C)
- Response Time: 1 second
- Testing Range: 1–2 inches (3–5 cm) away from forehead
3 color backlight LCD for easy reading

Patented probe design to ensure high accuracy

°C and °F readings available

Storage of the last 15 readings

**Forehead/Human Mode**
