**Streamline with TrimLine™ :
Containers and Dolly from Carlisle FoodService Products**

December 10, 2008, Oklahoma City, OK—TrimLine™ Waste Containers from Carlisle FoodService Products make waste management easy, and convenient. The TrimLine™ design allows for the 23-gallon capacity containers to be placed neatly beside work tables and in narrow spaces. Constructed with heavy duty plastic for easy cleaning, TrimLine™ Containers feature corner tabs to help keep trash bags secure and a helper handle on the bottom of the container to make lifting and dumping easier.

Now, you can also purchase a Wire Dolly for TrimLine™ Containers to make waste collection more efficient and safer for your employees. Sold separately from the can, the dolly will fit on both the narrow and the wide sides of the can and its heavy-duty wire frame construction allows for a weight capacity of 100 pounds.

You'll make work easier with the TrimLine™ Waste Container and Wire Dolly from Carlisle FoodService Products. Containers are available in a variety of colors to fit in front of house or back, such as brown, gray and black. New Recycle TrimLine™ versions are also available in blue and green. The containers display the recycle symbol on both sides of the container for convenience and easy recognition. And to make waste management discrete, both swing top and handled lids can be purchased for the TrimLine™ Containers in any color.

For more information about TrimLine™ Waste Containers and the more than 50,000 other Carlisle FoodService Products designed to help make your work easier, call 1-800-654-8210 or visit our website at www.carlislefsp.com.
